

# Stop Intruders In Their Tracks!

## With The **BANDIT**

A burglar knows that it takes time for someone to respond to an alarm activation. In just a few minutes, they can steal your valuables and escape without getting caught. For the first time, there is a solution to this rapidly growing problem.

The BANDIT will quickly fill a room with a thick fog during a break in that will incapacitate the burglar because he will not be able to see his hand in front of his face! This fog will stay in the room for at least 10 minutes, up to an hour, depending on the ventilation. The fog is color-less and disappears without a trace, not harming fabric, computers or leaving a residue. BANDIT should be installed in the room(s) that contain your most valuable objects to prevent their theft

When a BANDIT fog security machine is set off it produces a blast of fog at a rate of 600 cubic ft / second (17 cubic meters/second). Within 3 seconds the room is completely filled with fog leaving the thief disoriented and confused. Even an experienced burglar will be overwhelmed by a Bandit in action.

### THE BANDIT ADVANTAGE...

Thanks to new production techniques and patented technology, BANDIT carries a surprisingly attractive price tag. Its high efficiency, attractive design and 2 year warranty will convince you, this is the right security system for you.

### Features

- Self contained fog generating unit
- Quick easy connection
- Computer compatible – connects to IBM serial port
- Connects to existing alarm system
- Remote/Manual control activation
- Internal dip switches to meet installation expectations
- Wall mountable with flat brackets
- Corner wall mountable with swivel brackets
- Aesthetically pleasing/concealing – looks like audio speaker
- Fog's 200 sq.ft. X 9 ft. room in seconds
- LED troubleshooting/status signal indicators
- Auto battery backup up to 1 hr. fog deployment – 24 hr. electronic surveillance
- Dry discharge powder will not stain or damage room furnishings/equipment

### Specifications

- Power Supply - 110/220 VAC 50/60 hz
- Amperage – 5.7 amps
- Power backup - 12 VDC sealed battery packs
- Dimensions – 11”w x 13”d x 15”h
- Weight – 62 lbs.
- Liquid Content – 1 ltr. refill
- Ejection Pressure – 60 psi
